Create New Document

You can create a new blank document or upload an existing document (.txt, .doc, .docx, .rtf) to edit it with Grammarly.

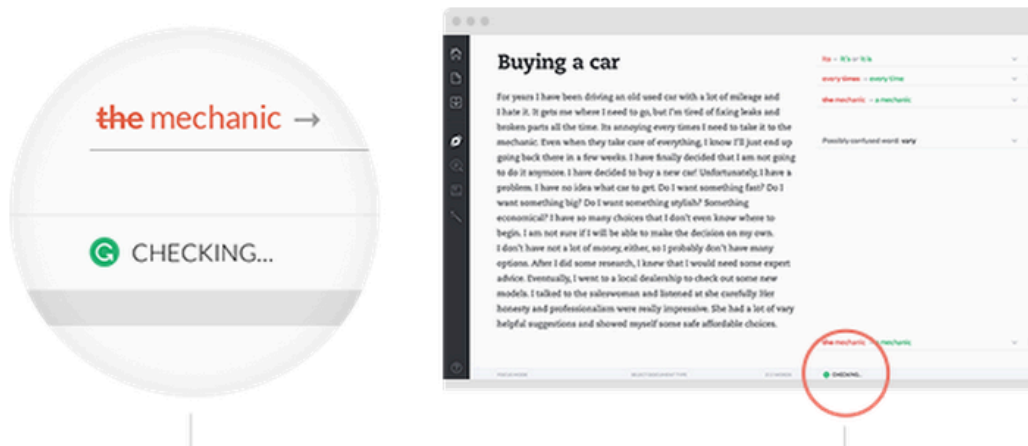

You can also create a new document from within an existing open document view.

Another option for importing existing text is to create a blank document, then paste in text from your clipboard (CTRL+V on PCs and ⌘+V on Macs).
Editing text

Grammarly automatically checks everything you type, making it easy to spot and fix errors quickly. When your document is being checked, a notification appears in the status bar at the bottom of the page. You can keep typing, and Grammarly will continue checking.

Changes to your document are automatically saved to Grammarly as you type, so you do not have to worry about losing your work.

Exporting document

Once you're finished editing, you can copy the text to your clipboard (CTRL+C on PCs and ⌘+C on Macs) or download the document.

If you started by uploading a document file, Grammarly will export your document in the same file format that you began with (for example, if you started by uploading a .doc file, your Grammarly document will be available to download as a .doc file).

Making corrections

Correction cards are shown to the right of the text, allowing you to correct a mistake in one click.

Accept a correction

Click on a suggested correction to apply the change in the text. To revert a recently applied correction, click Undo.

Add to dictionary

Words added to your personal dictionary are no longer highlighted as mistakes.
